### What is „PLAN-ICF“ about?

The "ICF-Plan" project is made to help teachers use the ICF for electronic support planning. It's meant to make learning better for students with developmental challenges.

We do this by using the International Classification of Functioning, Disability, and Health (ICF) as a common way to talk about what students need when planning school resources.

### Our Products

The project outcomes help professionals use a simple ICF template to create anonymised support plans without revealing personal information. We provide four free tools to specialists to support them in using the ICF:

1. **Training materials for specific ICF health topics.**
2. **Good examples of how others have used the ICF.**
3. **A toolkit with links to other helpful projects like [www.icf-cy-meduse.eu](http://www.icf-cy-meduse.eu), [www.icf-school.eu](http://www.icf-school.eu), and [www.icf-inclusion.net](http://www.icf-inclusion.net) for assessing and planning participation.**
4. **Answers to common questions (FAQs) based on practical ICF experience.**

### Participation in the Project

If you and/or your school would like to participate in the project (e.g. in piloting the project products), please contact us:
